

Definition of Pharmacokinetics

Pharmacokinetics is the study of the bodily absorption, distribution, metabolism, and excretion of drugs.

1. A method...

measuring...

preparing a plurality of lots^{of} solutions, each solution having a unique, known value of said pharmacokinetic parameter;

measuring the membrane fluidity or circular dichroism of said plurality of lots of solutions;

preparing a graphical correlation for said plurality of lots of solutions, said correlation^{being} between the membrane fluidity or circular dichroism and said pharmacokinetic parameter
unique, known value of said
